Conference Panel

Title: “Good Information” Overload: What are we to do?

Purpose: With this exponentially increasing amount of “good” information (having already filtered out the “bad”) and the ever increasing access to the same information,

- What is the future of teaching and education?
- How does the current proliferation of research and writing affect information overload?
- How are teaching, research, and life in general intertwined as it relates to our handling of information?
- And most importantly, what guidance do we have from God’s Word in addressing how we as Christians should respond to the info. glut?

The purpose of the panel is to bring together panelists who have wrestled with “good information” overload from different background and perspectives. The panel will present those perspectives as well as lead in the exploration of how teaching, research, and life will be impacted.

Panel: Four panelists with the following different backgrounds:

- 1 panelist with information management/systems perspective
- 1 panelist with management and business strategy perspective
- 1 panelist with administration perspective
- 1 panelist with research and writing perspective

Method: Each of the four panelists will present a 10-15 minute presentation of their experience and exploration of the topic. Audience discussion will be encouraged throughout the 1 ½ hour session.

Panelists:

Administrative perspective:

Dr. Larry Linamen

Provost
Colorado Christian University
Lakewood, CO 80226
Office Telephone: (303) 963-3357
llinamen@ccu.edu
